EKJV Exploration

Four drill rigs continued underground exploration and resource definition diamond drilling programs across the Rubicon-Hornet-Pegasus and Raleigh mining complexes during the quarter.

At Pegasus, infill drilling focussed on defining extensions to the Pode structure, extending the K2 structure at Pegasus South and the definition of the new Hera zone in the hanging wall to the K2 structure at depth.

Exploration diamond drilling also commenced from the new Raleigh South drill drive during the quarter targeting the southern extensions of the Raleigh Main Vein. All drill holes completed to date have successfully intersected the Raleigh structure with varying degrees of mineralisation including visible gold. Assay results are pending.

The Quarterly Report of the EKJV exploration activities has been received and will be released to the ASX.

OTHER EXPLORATION

Seven Mile Hill Joint Venture (Rand's Interest 50%)

The drilling programme is continuing.

Tapeta Iron Ore Project, Liberia, West Africa

The site is currently on care and maintenance.
